

Reference

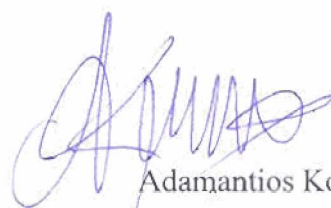

15th February 2008

With this reference we would like to confirm our cooperation with Balkan Services with whom we have submitted the following projects under these EU Programs:

- Project under CIP Program -*Life-event oriented one stop government social assistance services – OneStopSAS* (implementation of a platform for provision of eGovernment services for specific municipalities) submitted under **ICT PSP call for proposals 2007 - ICT PSP/2007/1**
- Project under INTERREG IV Program - Cicero project – sharing good practices and supporting a bottom-up development of e-government by strengthening the regional dimension of e-government initiatives

Both projects were multinational and involving a lot of partners and Balkan Service's role was to ensure the Bulgarian participation in the projects and help in developing the project proposals.

On the basis of the cooperation we have had so far, we would like to recommend Balkan Services as a reliable partner to work together on EU Projects and Programmes.
