

If you are looking for a meaningful change in your life

we may have the right opportunity for you!

Balkan Services is an IT consulting company helping organizations to nail the right software solution for their growing business and implement it in the fastest, most efficient, and smooth way.

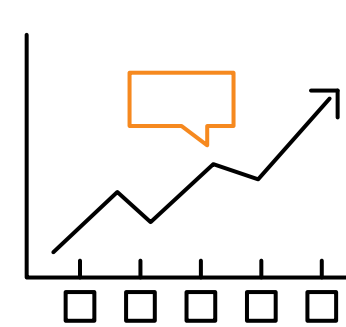

In relation to new projects and increased work volume, our team is growing.

**We are looking for:
BI Architect**

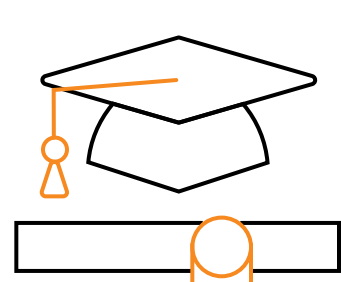

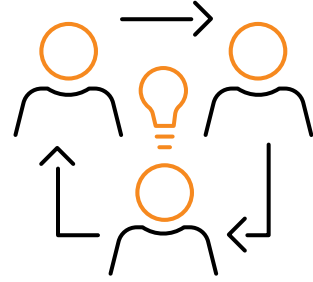

The role:

- This position is suitable for skilled consultants with a strong background in BI application integration.
- In this role, you will have a major impact on the success of our latest projects with Qlik, by implementing meaningful customer solutions in different industries. We rely on your skills and competencies in a diverse range of application development technologies.
- In our team you will have the opportunity to drive our customer's business strategy, development, data management and analytics with the aim of making customer successful in their journey to data driven decision making.
- Your role will be to function as our client's advisor and foremost developer of visual analytics and master of visualization and information design. You'll connect customer's data and create actionable visualizations and libraries for end users to rely on for their day-to-day business decisions. Your technical and analytical expertise will nurture customers to drive adoption and repeat purchases.

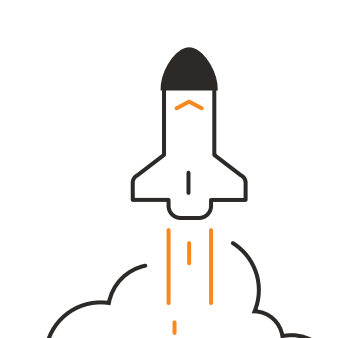

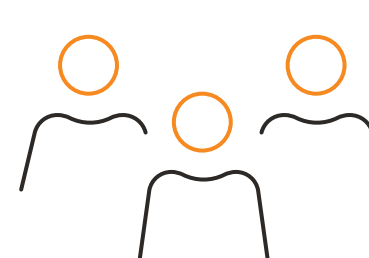

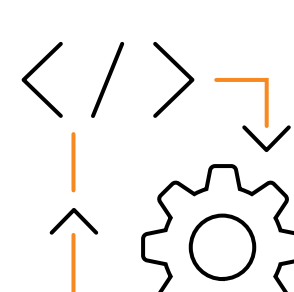

The responsibilities & skills:

- Providing billable professional services to our Customers in developing Qlik applications leveraging industry best practices.
- Managing activities including need analysis, data review, product demonstrations.
- Communicating via In-person, phone, email, and web meetings with customers assisting and guiding them through the design, development, implementation, and deployment process of Qlik applications.
- Driving all aspects of successful implementations from requirements and design to mentoring and delivery.
- Analyzing customer requirements and developing proposals of technical solutions.
- Helping customers architecting Qlik Application for Big data requirements.
- Optimize Qlik application and platform performance in a customer environment.
- 3+ years' experience in Business Intelligence or Data warehousing.
- Multiple years of experience with QlikView or Qlik Sense will be considered an advantage
- Must be willing to learn and adapt to new features and functionality with evolving products.
- Must be self-managed, responsive, and dedicated to exceptional customer support.
- Great problem-solving and analytical skills around data and analytics.
- Strong hands-on experience with relational databases and data modeling.
- Experience of BI tools and/or enterprise type (ERP, CRM) applications.

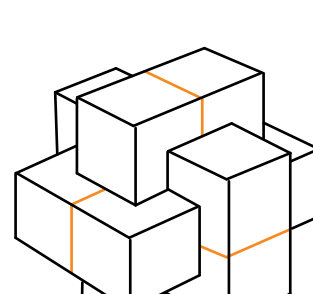

The working environment:

- Our team is made up of outstanding people with in-depth expertise, united by shared values and a desire to make a personal contribution. We believe in each other, support each other and share knowledge and experience. We are convinced that every adventure begins with an urge to change and a desire to challenge yourself. We know we only go far when we walk together and have the freedom to be ourselves.
- At Balkan Services we surround ourselves with bright, motivated and proactive individuals who love their work and see value in it. We believe that being happy is closely linked to being productive and we create an environment with a good work-life balance.
- By joining our energetic and tight-knit team, you can translate your ideas into working business solutions, and participate in diverse and challenging projects for leading companies. If you want to work in a friendly atmosphere where helpfulness, open-mindedness and laughter are valued, you'll feel right at home with us!"

Please send your CVs to jobs@balkanservices.com or apply using your LinkedIn account.

The first part of our recruitment process is a task that we will send to approved candidates.

The second part of the recruitment process will be an interview with the candidates who succeeded with the task.
